TAILED ACTION

Response to The Petition

1. The present Office action is made in response to the Petition (Paper No. 4) filed by applicant on 02/21/2002. It is also noted that the Petition was granted by the office as set forth in the Office action (Paper No. 6) mailed to applicant on 04/08/2002.

Election/Restrictions

2. It is noted that in the restriction requirement (Paper No. 2) mailed to applicant on 11/30/2001, the Office action missed one section concerning the status of claims 1-11 in the restriction. The Examiner sincerely apologize for that advantage.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-28, drawn to a microscope having two polarization systems disposed in specific manner with respect to a specimen, classified in class 359, subclass 386.
- II. Claims 29-43, drawn to a microscope having two light sources system disposed in a specific manner with respect to a specimen, classified in class 359, subclass 385. It is noted that while claim 31 discloses a polarization system; however, the claim does not provide specific features for the polarization system as the invention of the group I.

4. Claims 1-11 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1-11. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including

Art Unit: 2872

all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility for use in a microscope for polarizing illuminating light without the use of an additional light source as defined in the invention II, and the invention II has separate utility for use with a microscope having two light sources without the use of specific polarization systems as defined in the invention I. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and different searches, restriction for examination purposes as indicated is proper.

7. A telephone call was made to George L. Snyder on 11/20/2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Nguyen whose telephone number is 703 308 4814. The examiner can normally be reached on M-F.
